APPAREL MANUFACTURING

Streamline your Stitching: Apparel Manufacturing with HoneycombERP®

Designed especially for garment manufacturers, HoneycombERP®-Apparel Manufacturing gives you activity based costing for your manufacturing, helps you manage your Production Sales, Customers, Purchases, Inventory and Accounting in a masterfully integrated suite.

Apparel/ Garment Manufacturing

HoneycombERP®-Apparel Manufacturing delivers control and visibility over production costs, estimates, and configurations so you can better deliver products in time and within budget. A true Activity Based Costing solution providing costs incurred when a task is performed. This gives garments manufacturers the edge to price their products or manufacturing services competitively and accurately.

HoneycombERP®-Apparel Manufacturing helps you manage your Procurement, Inventory, Stores, Production, Sales, Customers and Accounting. Our Supply Chain Management system keeps track of inventory on-hand quantities, location of goods, requisitions, quotations, purchase orders, inventory items requested by production, and goods received note. Shipment Management helps you manage deliveries to your customers.

HoneycombERP®-Apparel Manufacturing has a complete approval mechanism that starts from Production Planning, covers batches/lots under process and ends at finished goods moved to finished goods store. Manages your shop floor, machines maintenance and repairs, tools and gauges and production workforce.

All modules are integrated and a complete workflow management allows processes to be monitored and controlled without manual intervention at any level, leaving no chances of error.
