CONSTRUCTION MANAGEMENT

Maximize Margins: Construction Management Solution with HoneycombERP®

Drive profitable growth with HoneycombERP®-Construction Management Solution for construction companies and builders. We cover everything from resource and material costing to project management and HR.

With HoneycombERP®-Construction Management Solution, improve efficiencies, reduce risk, and control labor to maximize margins.

Construction Management

HoneycombERP®-Construction Management Solution is a well-integrated and detailed solution for your construction industry. Helps you manage multiple projects with varying scopes and timelines concurrently while maintaining cost of material, labor, time and other related aspects for each project separately.

HoneycombERP®-Construction Management Solution provides visibility across your business leading to increased transparency and control, efficient resource management, improved cost variance and monitoring; streamlining work processes and ensuring timely project closure for maximizing your profit margins.

Helps in organizing your human resource by managing attendance, leaves, payroll and compensation. Easily manages material, warehouse, issue, receipt and billing. Provides you accurate financial visibility and tracks each transaction going through multiple accounting processes with little or no human intervention.

HoneycombERP®-Construction Management Solution delivers a broader view and helps you track different aspects of your projects with real-time, drill down dashboards and business analytics leading to quick and effective decision making. Identifies profitable opportunities, monitors and measures revenues and profits and enables risk management.
