

HONEYCOMB ERP

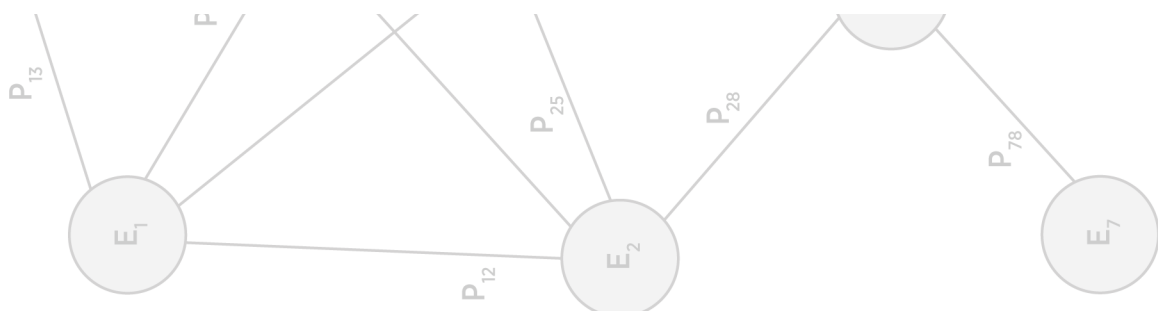

FMCG Distribution

Proactively Manage your Supply Chain: FMCG with HoneycombERP®

One interlinked modular solution which enables planning, sourcing, stocking, selling and recovering with precise operational excellence for FMCG Distribution companies. Includes precise tools to efficiently strategize, assemble, distribute and deliver goods to your customers, on their demand. HoneycombERP®-FMCG is a profound supply chain solution that improves flexibility and collaboration through customer relationship management, business intelligence and multi-order channel processing.

FMCG Distribution

Designed for the distribution industry, *HoneycombERP®-FMCG Distribution* helps you manage your Procurement, Inventory, Stores, Production, Sales, Customers and Accounting. Our Supply Chain Management system keeps track of inventory on-hand quantities, purchase orders, sales order, and inventory items requested by customers. Enables you to control your warehouses and stores activity from one central location, allowing tracking of each issue and receipt.

HoneycombERP®-FMCG Distribution makes it very easy to manage clients, increase sales, improve customer relations, view accurate sales forecasts, identify demand trends, analyze sales history, highlight product profitability, and measure effectiveness of sales promotions and marketing campaigns with drill-down dashboards and analytics.

Designed by expert business analysts, *HoneycombERP®-FMCG Distribution* encompasses all key elements of a distribution industry with payroll compensations and integrates them into a single window, opening up new horizons of opportunities and delivering a platform for better performance to your organization.
