

HONEYCOMB ERP

MULTI-RETAIL

Build Your Retail Enterprise: Multi-Retail Management with HoneycombERP®

Gives your consumers products, information, and personalized shopping experiences with retail management. Connects real-time customer and Point of Sale (POS), reaches consumers across locations and boosts your Shop Management from merchandising to Supply Chain. Location wise pricing, customized packaging, Hire Purchase Packaging and Warehouse & Store Inventory Management for all your retail outlets controlled from one central site.

Multi-Retail Management

HoneycombERP®-Multi-Retail Management provides you a complete & comprehensive retail chain management solution which concurrently handles several retail stores at multiple geographical locations. Provides you real-time visibility and control over your retail chain, giving you information on your daily transactions, sales and stock position at each store.

HoneycombERP®-Multi-Retail Management gives you flexibility of managing different pricing packages for different stores at different zones, regions or areas. Also gives you the flexibility to design and deploy hire-purchase/ leasing packages for each store or a group of stores in a specific zone or region.

Enables your senior management to control warehouses and stores from one central location, allowing tracking of each issue and receipt along with the current value position of each store. Also provides the flexibility of selling stock of other stores in case of non-availability in one store, resulting in higher levels of customer satisfaction

Our unique Shop Management module provides you an online Point-of-Sale (POS) and manages complete business processes of your stores; stock management, sales force management, shop expenses, time & attendance and staff salary along with daily opening and closing of each shop.

HoneycombERP®-Multi-Retail Management makes it very easy to manage consumer demand, increase sales, improve customer relations, view accurate sales forecasts, identify demand trends, analyze sales history, highlight product profitability, and measure effectiveness of sales promotions and marketing campaigns with drill-down dashboards and business analytics.
